Skills

- | | |
|----------------|---|
| Languages | ▪ PHP, Python, Java, JavaScript, C, C++ |
| OS | ▪ Windows, Mac, Linux Ubuntu |
| IDEs, Software | ▪ VS Code, VIM, IntelliJ, VirtualBox, Git, Laravel, jQuery, WordPress, AWS |
| Databases | ▪ Microsoft SQL Server, MySQL |
| Other Skills | ▪ Precise and detail oriented when working on projects,
Works well independently and in group settings,
Strong planning and organization skills,
Flexible in quickly changing environments |

Technical Work Experience

May 2022 – Dec 2022 **Co-op Full Stack Developer**

- Gravit-e Technologies Inc.
Vancouver, BC
- Efficiently context switched between 30 projects to work on high priority tickets in a fast-changing environment.
 - Updated a datetime structure for booking system, resulting in 100% reliable appointment tracking due to properly accounting for time zones.
 - Created APIs that delivered sales rep data for e-commerce sites 100s of times each day.

Sep 2020 – Apr 2021 **Co-op Embedded Software Developer**

- Sierra Wireless
Richmond, BC
- Created static IP functionality for routers acting as hotspots, providing emergency services with 100% consistent IPs in remote locations.
 - Replaced a PHP cron job with a C++ daemon, resulting in a major increase in reliability due to auto-starting and auto-recovery from crashes.
 - Enforced data integrity and improved security in a legacy SQL database, resulting in a database without duplicate entries.
 - Migrated a legacy codebase from PHP 5.6 to 7.2 to improve performance and security.

Technical Project Experience

Fall 2023 - Spring 2024 Healthcare Management Website

- Designed an example healthcare website in PHP, HTML, and JavaScript.
- Created a roles and permissions framework so that users can access different parts of the website based on their access level.
- Implemented an appointment booking system that allows patients to book appointments with physicians based on a physician's availability.

Fall 2021 Computational Vision SFU, Burnaby, BC 3D Image Reconstruction

- Used two images and sets of points for an object at different angles to create matrices that determined the relationship between the two images.
- Triangulated the pairs of 2D points using the relationship between the images to find a set of 3D points and make a sparse 3D reconstruction of the object.
- Rectified the 2D images and computed a dense 2D reconstruction in the form of a depth map.

Summer 2021 Object Oriented Design in Java SFU, Burnaby, BC Task Tracker

- Implemented a model-view-controller design pattern with classes for holding task information, managing a list of tasks, and displaying the UI.
- Used object-oriented methodology to minimize coupling between classes.
- Used gson to save and load tasks in Json files to prevent needing to manually remake the list on subsequent uses of the program.
- Created GUI with Java Swing containers and event listeners for ease of interaction.

Interests

2017 - 2023

- Enjoy playing video games and board games with friends. Grew up with Lego and enjoy building display sets.

Awards

2019

- SFU President's Honour Roll

2017

- Governor General Award – Bronze Medal
